() It lasts about 5 minutes and I'm guessing that's longer than vagrant's login timeout.. How to reproduce the error: > cd ~/geerlingguy-drupal-vm-ac56269/ (straight out of the zip file) > vagrant up Bringing machine 'drupalvm' up with 'virtualbox' provider.. These errors are usually good hints as to what may be wrong If you're using a custom box, make sure that networking is properly working and you're able to connect to the machine.. If I start the VM manually from within VirtualBox and wait, after about 5 minutes I'm asked username and password.. If the box appears to be booting properly, you may want to increase the timeout ('config.. vm boot_timeout') value I showed the GUI of the guest OS via Virtualbox and it is stuck on a black screen stating: [6.. It is a common problem that networking isn't setup properly in these boxes Verify that authentication configurations are also setup properly, as well.. ==> drupalvm: Booting VM ==> drupalvm: Waiting for machine to boot This may take a few minutes. ae05505a44 [cara mendownload buku pelajaran penerbit erlangga di]
