Hello all, I am sure there are many people pissed off about the SafeLink in Microsoft Outlook.. At some point I got an update and ever since then I can not click on a single link within my 'trusted' emails that doesn't open a blank google page.. • Under Personal Settings, click General • Under Folder list, uncheck the Group similar folders, such as Inboxes, from different accounts check box.

By default, the Outlook 2016 for Mac folder list groups similar folders, such as inboxes, from all your email accounts together.. Ones Sync completed, next day again whole inbox, folder again syncing started, so my work is suffering because of new mails not opening properly only downloading showing.. I just want the feature to be turned off!! Microsoft, if you're listening (DISABLE THIS FEATURE)!.. Mac os x lion 10 7 for vmware windows 7-64 bit download To turn off unified inbox so that each account and all its folders are separated in the folder list: • On the Outlook menu, click Preferences.. This feature may make it difficult to tell which folders and messages will have the 16-month employee email retention policy applied to them. 6e4e936fe3 [Pen Tablet Driver For Mac Os Mojave](#)
